

Both my wife and I drive a semi tractor/trailer over the road and we have an XM satellite radio. We can receive all clear channels anywhere we go and we found that it is a very valueable source for the weather and traffic reports. we do pay a fee every month for the services XM provides. Therefore we feel that the National Association of Broadcasters does NOT have the right to dictate what we are permitted to hear on this radio.

Please reject the proposed NAB PETITION 04-160 that is before you and please support XM's ability to keep providing the programming that they have now and in the future. As I said before, this is a very valueable "tool" to us and to others. Thanks

Respectfully yours
Jerry and Carol Greiner
